#### OFFICE OF THE CITY COORDINATOR

September 19, 2014

To the Mayor, City Council and Citizens of the City of Florence, Kentucky:

State law requires that all general-purpose local governments publish within seven months of the close of each fiscal year a complete set of financial statements presented in conformity with generally accepted accounting principles (GAAP) and audited in accordance with generally accepted auditing standards by a firm of licensed certified public accountants. Pursuant to that requirement, we hereby issue the comprehensive annual financial report of the City of Florence for the fiscal year ended June 30, 2014.

This report consists of management's representations concerning the finances of the City of Florence. Consequently, management assumes full responsibility for the completeness and reliability of all of the information presented in this report. To provide a reasonable basis for making these representations, management of the City of Florence has established a comprehensive internal control framework that is designed both to protect the government's assets from loss, theft, or misuse and to compile sufficient reliable information for the preparation of the City of Florence's financial statements in conformity with GAAP. Because the cost of internal controls should not outweigh their benefits, the City of Florence's comprehensive framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements will be free from material misstatement. As management, we assert that, to the best of our knowledge and belief, this financial report is complete and reliable in all material respects.

The City of Florence's financial statements have been audited by Rankin, Rankin and Company, a firm of licensed certified public accountants. The goal of the independent audit was to provide reasonable assurance that the financial statements of the City of Florence for the fiscal year ended June 30, 2014, are free of material misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial statement presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unqualified opinion that the City of Florence's financial statements for the fiscal year ended June 30, 2014, are fairly presented in conformity with GAAP. The independent auditor's report is presented as the first component of the financial section of this report.

GAAP requires that management provide a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of Management's Discussion and

Analysis (MD&A). This letter of transmittal is designed to complement MD&A and should be read in conjunction with it. The City of Florence's MD&A can be found immediately following the report of the independent auditors.

#### Profile of the Government

The City of Florence, founded in 1830, is located in the northern most part of the state, situated in Boone County and is part of the Northern Kentucky Region, which ranks as one of the top growth areas in Kentucky. The City of Florence currently occupies a land area of 10.4 square miles and serves an estimated population of 31,088. The City of Florence is empowered to levy numerous sources of revenue including its major sources payroll tax, business license tax, insurance premiums tax and a property tax on both real and personal properties. It is also empowered by state statute to extend its corporate limits by annexation, which occurs periodically when deemed appropriate by the governing body.

The City of Florence operates under the Mayor/Council form of government. Legislative authority is vested in the City Council, consisting of six City Council members. The Mayor is the executive authority. The City Council is responsible, among other things for passing ordinances, adopting the budget and appointing members to various boards. The Mayor approves the hiring of all full time employees. The City Coordinator reports directly to the Mayor and is responsible for carrying out policies and ordinances of the City Council and is responsible for the development of short and long range planning, capital improvement programs and running the day-to-day operations of the city. The City Council is elected on a non-partisan basis. The Mayor serves based upon a 4 year term and the City Council serve based upon a 2 year term. The next election for the Office of Mayor will be held in 2014 with the Mayor to take office January 1, 2015. The next election for City Council will be held in 2014 with the Council to take office on January 1, 2015.

The City of Florence provides a full range of services, full time professional police force and full time professional fire protection; advanced life support medic services; street maintenance and improvement; water and sewer services; storm water collection; a full range of recreational facilities and activities; cultural events; planning and zoning and code enforcement.

The annual budget serves as the foundation for the City of Florence's financial planning and control. All departments of the City of Florence are required to submit requests for appropriation to the City Coordinator. The City Coordinator uses these requests as the starting point for developing a proposed budget. The City Coordinator then presents this proposed budget to the Mayor for review. The Mayor and City Coordinator then present the budget to the City Council for review. Then, City Council budget work sessions are held on the proposed budget. The final budget is adopted by July 1. The appropriated budget is prepared by fund and department (e.g., police). Expenditures may not legally exceed budgeted appropriations at the departmental level. Any revisions to the budget that would alter total revenues and department expenditures of any fund must be approved by the City Council.

#### Factors Affecting Financial Condition

The information presented in the financial statements is perhaps best understood when it is considered from the broader perspective of the specific environment within which

the City of Florence operates.

<u>Local economy</u>. Florence's location is a major factor in allowing it to become an economic force in the Greater Cincinnati/Northern Kentucky region. Also, the consistent and persistent effort put forth by Florence's elected and appointed officials and other community leaders over the past twenty years has positioned the City very well.

The focus on financial management and economic development has established the City as a center of commerce in the Greater Cincinnati and northern Kentucky region. Private investment and job growth continue in the city. Continuing efforts are paying dividends, and the City is experiencing successes from large to small, all of which are very important to our community.

For example, this past year, Northern Kentucky University's Center for Economic Analysis and Development released a study about commuter-adjusted populations in the Greater Cincinnati region. The commuter-adjusted population is the expansion or contraction of the worker population throughout a typical workday.

Among all communities in northern Kentucky, Florence had the strongest net-inflow of workers, with our employment to residence ratio of 1.51 to 1. Boone County has the strongest employment to resident ratio among northern Kentucky counties at 1.21 to 1, which is behind only Hamilton County in the tri-state region. Kenton County's ratio is 0.84 to 1, and Campbell County's ratio is 0.68 to 1.

Areas that have an employment to resident ratio of greater than 1.00 are where there are more jobs than the number of working residents; therefore, the city imports part of its labor and classifies us as a "job hub."

When we analyze the commercial real estate market in Florence, we shape up rather well in the region. Leasing and purchasing activity in the retail, industrial, and office sectors have been very active. On the retail side, our vacancy rate in the city is below 4%, which is one of the best performers in the region, where the regional retail vacancy is 8.4%. The industrial vacancy rate is under 2%, while the overall vacancy rate in the region is 6.7%. And, the professional office vacancy rate in Florence is 12%, with the region's rate at 20.6%. Overall, we fair better than most communities in the region. These are positive signs of the strength of our economy in Florence, but it does suggest, particularly on the industrial front, that future growth could be constrained without available industrial real estate coming onto the market.

All of these factors are very strong and positive indicator of Florence's overall economy. It is truly the perfect time to do business in the City of Florence.

There were several state transportation projects that were completed during the year that are all of great benefit to the residents, visitors and businesses of the City. In addition, the City is moving forward with additional enhancements to Mall Road. The City is proposing and working with the State to construct a frontage road that will link up with Connector Drive. A new entrance ramp from mall Road to southbound I-75 is in the Kentucky Transportation Cabinet's six-year road plan proposed by the Governor and adopted by the legislature.

The City has also completed numerous sidewalk, street improvements, storm water, sanitary sewer and water improvements throughout areas of the City. In addition, the City has finished the construction of a new Fire Substation on Woodspoint Drive.

Long-term financial planning. The city has implemented a three-year budget plan. The three-year budget plan serves as a basis for a rolling three-year strategic plan for the City. This plan will carry out the City's vision as adopted by the City Council. Long-term future sustainability is the primary focus of the budget plan.

The City is continuing to explore the possibility of developing new parks and adding amenities to existing parks. After the completion of the projects mentioned in the paragraphs above, there are no large construction projects planned.

#### Relevant Financial Policies

The City of Florence has adopted a comprehensive set of financial policies addressing various areas of operations such as revenue collection, banking services, investment policies, debt management, budget management and fund balance reserves.

The unassigned fund balance in the general fund is 130.47% of total general fund revenues and falls within policy guidelines. The City strives to maintain at least 25 percent of total general fund revenues so as to reduce amounts that may need to be borrowed in the future.

#### Awards and Acknowledgements

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the City of Florence for its comprehensive annual financial report (CAFR) for the fiscal year ended June 30, 2013. This was the ninth consecutive year that the City has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized CAFR. This report must satisfy both GAAP and applicable program requirements.

A Certificate of Achievement is valid for a period of one year only. However, we believe that our current CAFR continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

The preparation of this comprehensive annual financial report on a timely basis was made possible by the dedicated service of the entire staff of the departments of Finance and Administration. Each member of both departments has my sincere appreciation for the contribution made in the preparation of this report. Credit must also be given to the Mayor and Council for their unfailing support for maintaining the highest standards of professionalism in the management of the City of Florence's finances.

Respectfully submitted.

FINANCIAL SECTION

#### INDEPENDENT AUDITOR'S REPORT

Honorable Diane E. Whalen, Mayor Members of City Council City of Florence, Kentucky

#### Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of City of Florence, Kentucky, as of and for the year ended June 30, 2014, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

#### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

#### **Opinions**

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Florence, Kentucky, as of June 30, 2014, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

#### Other Matters

#### Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and budgetary comparison information on pages 13 and 53 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express as opinion or provide any assurance.

#### Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City of Florence, Kentucky's basic financial statements. The introductory section, combining and individual budget and actual nonmajor fund financial statements, and statistical section, are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining and individual budget and actual nonmajor fund financial statements are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the combining and individual budget and actual nonmajor fund financial statements are fairly stated in all material respects in relation to the basic financial statements as a whole.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

#### Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated September 12, 2014, on our consideration of the City of Florence, Kentucky's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards considering City of Florence, Kentucky's internal control over financial reporting and compliance.

**RANKIN, RANKIN & COMPANY** 

Ft. Wright, Kentucky September 12, 2014

#### MANAGEMENT'S DISCUSSION AND ANALYSIS (UNAUDITED)

As management of the City of Florence, we offer readers of the city's financial statements this narrative overview and analysis of the financial activities of the City of Florence, Kentucky for the year ended June 30, 2014. We encourage readers to consider the information in conjunction with the letter of transmittal, which can be found on pages 1-4 in this report.

#### **Financial Highlights**

The assets of the City exceeded its liabilities at the close of the most recent year by \$168,298,055 (net position). Of this amount, \$79,645,053 (unrestricted net position) may be used to meet the government's ongoing obligations to citizens and creditors.

As of the close of the current fiscal year, the City's governmental funds reported a combined ending fund balance of \$57,413,132. This was an increase of \$6,760,235 comparison to the prior year. The increase was mainly the result of the City's general operating fund.

At the end of the current fiscal year, unassigned fund balance for the general fund was \$42,361,680, or 147.89% of total general fund expenditures, transfers and other expenditures.

#### **Overview of the Financial Statements**

This discussion and analysis are intended to serve as an introduction to the City's basic financial statements. The basic financial statements encompass three components: 1) government-wide financial statements; 2) fund financial statements; and 3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements. These two statements report the City's net assets and changes in them.

Government-wide financial statements. The government-wide financial statements are designed to provide readers with a broad overview of the City's finances, in a manner similar to a private-sector business.

The statement of net position presents information on all of the City's assets, liabilities and deferred inflows/outflows of resources, with the difference being reported as net position. Over time, the increases and decreases in net position may serve as a useful indicator of whether the City's financial position is improving or deteriorating. Other nonfinancial factors such as changes in the City's property tax base and the condition of the City's infrastructure will also assist in assessing the overall financial health of the City.

The statement of activities presents how the government's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of cash flows. As a result, revenues and expenses are reported in this statement for some items that will only result in cash flows for future fiscal periods (e.g., uncollected revenue and earned but unused vacation leave).

Both of the government-wide financial statements distinguish functions of the City that are principally supported by taxes, license fees and intergovernmental activities which are considered governmental activities, from those functions that are intended to cover all or a significant portion of their costs through user fees and charges which are considered business-type activities. The governmental activities include most of the City's basic services. These include but are not limited to police, fire, street maintenance, parks and recreation, and general administration. The business-type activities include the City's water and sewer service operations and the golf course operations.

The government-wide financial statements include not only the City of Florence itself (known as the primary government), but also the City of Florence Municipal Properties Corporation for which the City is financially accountable.

The government-wide financial statements can be found on pages 24 and 25 of this report.

Fund financial statements. A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities and objectives. Some funds are required to be established by State law. However, the City Council establishes many other funds with specific sources of revenue to help it control and manage money for particular purposes (i.e., Infrastructure Fund and Aquatic Center Fund) or to show that it is meeting legal responsibilities for grant and restricted funds (i.e., Municipal Aid Fund and Asset Forfeiture Fund). All funds of the City can be divided into three categories: governmental funds, proprietary funds and fiduciary funds. The City's two kinds of funds, governmental and proprietary, use different accounting approaches.

Governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on how money flows into and out of those funds and the balances left at year-end that are available for spending. The governmental fund statements provide a detailed short-term view of the City's general government operations and the basic services it provides. Governmental fund information helps to determine whether there are more or fewer financial resources that can be spent in the near future to finance the City's programs.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for the governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

The City of Florence maintains four individual governmental funds. Information is presented separately in the governmental balance sheet and in the statement of revenues, expenditures and changes in fund balances for the general fund which is considered to be a major fund. Data from the other three governmental funds are combined into a single, aggregated presentation. Individual fund data for each of these non-major governmental funds is provided in the form of combining statements elsewhere in this report.

The City adopts an annual appropriated budget for its general fund. A budgetary comparison statement has been provided for the general fund to demonstrate compliance with this budget.

The basic governmental financial statements can be found on pages 26-28 of this report.

Proprietary funds. The City maintains two different types of proprietary funds. Enterprise funds are used to report the same functions presented as business-type activities in the government-wide financial statements. The City uses enterprise funds to account for its water and sewer service operations and the golf course operations. Internal service funds are an accounting device used to accumulate and allocate costs internally among the City's various functions. The City uses an internal service fund to account for its health and dental costs.

Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. The proprietary fund financial statements provide separate information on the water and sewer service and the golf course operations, both of which are considered major funds of the City of Florence. Since there is only one internal service fund, separate information is provided.

The basic proprietary fund financial statements can be found on pages 29-31 of this report.

**Notes to the financial statements.** The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

The notes to the financial statements can be found on pages 33-51 of this report.

**Other information.** In addition to the basic financial statements and accompanying notes, this report also presents certain required supplementary information. The budgetary comparison schedules and combining statements and schedules can be found on pages 53-60 of this report.

#### **Government-wide Financial Analysis**

As noted earlier, net position may serve over time as a useful indicator of a government's financial position. In the case of the City of Florence, assets and deferred outflows of resources exceeded liabilities by \$168,298,055 at the close of the most recent year.

The largest portion of the City's net position (52.53 percent) reflects its investment in capital assets (e.g. land, buildings, machinery and equipment), less any related debt to

finance those assets that is still outstanding. The City uses these capital assets to provide services to its citizens; consequently, these assets are not available for future spending. Although the City's investment in its capital assets is reported net of related debt, it should be noted that the funds needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

For the years ended June 30, 2014 and 2013 net position changed as follows (amounts in thousands):

		Governme	nta	<u>II Activities</u>	E	lusiness-	yp	a Activitie	8	1	ota	al .

assets, net of debt		61,572		59,736		26,833		26,694		88,405		86,430
Restricted		***				248		248		248		248
Unrestricted		70,967		63,305		8,678		8,050		79,645		71,355
Total net position	\$	132,539	\$	123,041	\$	35,759	\$	34,992	<b>.</b> \$	168,298	\$	158,033

An additional portion of the City's net position (1 percent) represents resources that are subject to external restrictions on how they may be used. The remaining balance of unrestricted net assets (\$79,645,053) may be used to meet the government's ongoing obligations to its citizens and creditors.

At the end of the current fiscal year, the City was able to report positive balances in all three categories of net assets, both for the government as a whole, as well as for its separate governmental and business-type activities. The same situation held true for the prior fiscal year.

Net position of the City increased 6.49% or \$10.3 million during the current fiscal year. The increase was mainly attributed to the growth in the revenue line items outpacing the growth in operating and contractual expenses.

**Governmental activities**. Governmental activities increased the City's net position by \$9.5 million, thereby accounting for 92.53% of the total growth in net position. Key elements of this growth are as follows:

• Taxes increased slightly over fiscal year 2013. The payroll tax position increased by \$237,000 during 2014 as a result of slightly improved economic conditions and economic development. However, in 2014, the sales growth rebound leveled off and occupational license fees decreased by \$124,882. Another revenue increasing as a result of the improved economic conditions was the insurance premium tax. It increased by \$176,274. The City's property tax revenues increased slightly due to collections. The property tax revenue

increased by \$113,363 despite relatively no increases in the assessed values and not raising of the tax rate for the fifth straight year in a row. Capital grant revenue increased by \$380,000 as a result of the grants for various road and sidewalk projects. However, operating grant revenue decreased by \$1,443,797.

• There was a slight increase of \$158,661 for governmental activities due to the increase in wages and benefit costs.

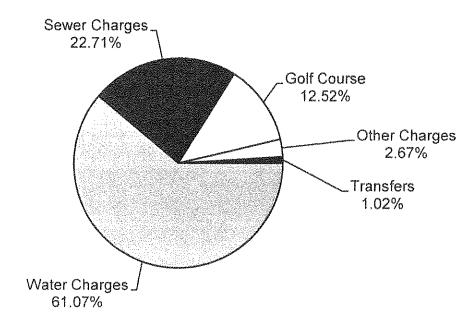

#### Revenues by Source - Governmental Type Activities

**Business-type activities.** Business-type activities increased the City's net position by \$766,309, accounting for 7.47 percent of the total growth in the government's net position. Key elements of this increase are as follows:

- In reviewing the net (expense)/revenue, the water and sewer sales and service function showed net income for the year of \$792,363. The income was attributable to operations due to a four percent increase in rates implemented on April 1, 2013. In addition, expenses increased by \$110,347 higher wage and benefit costs along with an increase in water purchasing costs.
- The golf course fund showed a net loss for the year of \$26,054 as a result of operations. The loss was the result of an increase in revenues of \$20,421 being offset by an increase in operating expenses of \$57,079 due to yearly cost increases and an aging facility. In addition, an operating transfer was made during the year as a result of the ongoing debt service commitments.

#### Revenues by Source - Business Type Activities

#### Financial Analysis of the Government's Funds

As noted earlier, the City uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental funds. The focus of the City's governmental funds is to provide information on near-term inflows, outflows and balances of spendable resources. Such information is useful in assessing the City's financing requirements. In particular, unreserved fund balance may serve as a useful measure of a government's net resources available for spending at the end of a fiscal year.

At the end of the current fiscal year, the City's government funds reported combined ending fund balances of \$57,413,132, an increase of \$6,760,235 in comparison with the prior year. Approximately 79.46 percent of this total amount constitutes unassigned fund balance, which is available for spending at the government's discretion. The remainder of the fund balance is classified as nonspendable, committed to or assigned to indicate that it is not available for new spending because of constraints that have been placed on the use of these resources for specific purposes either internally or externally.

The general fund is the chief operating fund of the City. At the end of the current fiscal year, unassigned fund balance of the general fund was \$42,361,680 while total fund balance was \$49,834,282. As a measure of the general fund's liquidity, it may be useful to compare unassigned fund balance and total fund balance to total fund expenditures. Unassigned fund balance represents 147.88 percent of total general fund expenditures and transfers, while total fund balance represents 173.97 percent of that same amount.

The fund balance of the City's general fund increased by \$3,824,840 during the current fiscal year. Key factors in this growth are as follows:

- Cost cutting measures enacted to offset consistent revenues. Several full-time personnel positions have continued to not be filled.
- Payroll taxes, property taxes and insurance premium tax made a recovery and produced results stronger than originally anticipated
- The City enacted payroll and insurance premium tax increases on July 1, 2007 that were part of a long-range plan. This enactment has continued to enable the City to build reserves.
- Operating expenditures are continuing to increase as a result of higher wages, benefit costs and additional personnel in the fire department.

The municipal aid road/LGEA fund has a total fund balance of \$967,268, all of which is restricted for street improvements and snow removal expenditures. The net increase in fund balance during the year was the result of a decrease in the dollar amount of street projects budgeted for the current year. The asset forfeiture fund had an increase in fund balance of \$67,360 as a result of the amount of seized forfeitures received during the year. The aquatic center fund had a fund balance decrease of \$179,112 as a result of a cool and rainy May and June that affected attendance.

*Proprietary funds.* The City's proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail.

Unrestricted net assets of the water and sewer service fund at the end of the year amounted to \$7,654,706 and those for the golf course operations amounted to \$1,023,058. The growth in net position for the water and sewer fund was \$792,363 and the net loss in the golf course fund was \$26,054. Other factors concerning these two funds have already been addressed in the discussion of the City's business-type activities.

#### **General Fund Budgetary Highlights**

Over the course of the year, the City Council revised the general fund budget two times. The budget amendments were to adjust the beginning fund balance to actual and to increase/decrease revenues and expenditures to more closely reflect the anticipated actual revenues and expenditures for the year based on prior year results and current year developments.

In particular, during the first amendment, capital line items were adjusted to include additional carryover amounts from the 2013 budget for projects that were started but not completed by June 30, 2013. In addition, there were also amounts added to several expenditure line items for unanticipated repairs and maintenance items that that were encountered for the Aquatic Center and the Government Center building. The City was also in the midst of an agreement to provide infrastructure funding to aid the development of a parcel of land for future development that required an additional expenditure amount. All beginning fund balance amounts were adjusted to reflect the ending balances from the prior June 30 per the audit report.

The second amendment basically adjusted some of the General Fund revenues to more closely reflect anticipated revised projections and the addition of recently awarded grant amounts. In addition, the amendment adjusted expenditure line items that were affected by the unusual amounts of snowfall, the additional costs of six firefighters hired under the SAFER grant and the addition of some unexpected capital expenditures related to grants. Original health and dental claims expenses needed to be increased as well for an increase in administrative fees and the costs for the newly opened clinic. The Golf Course Fund revenues and expenses were adjusted to reflect expected results for the fiscal year.

All of the general fund department's actual results came in under the final budgeted amounts. All departments were under budget in the salaries, pension costs and health insurance line items. Travel and training, community relations and supply reductions in each department also contributed to lower than budgeted amounts. Motor fuel costs were exceeded in all of the departments due to the increase in the costs. The overall philosophy implemented in previous years to only make necessary purchases continues to contributed to lower expenditures throughout the City departments.

The current year budget relied on the expectation of relatively flat property tax revenue and slight increases for payroll tax, occupational license fees and insurance premium tax revenues. The actual results showed a slight decline in occupational license fees. However, the property tax, insurance premium tax and the payroll tax resulted in higher than anticipated amounts. Final actual revenue categories exceeded final budgeted revenue amounts by \$1,489,933. This was due to the growth in the revenue for the property tax, payroll tax, intergovernmental revenues and insurance premium tax. Actual expenditures and transfers came in \$2,531,204 under the budget amounts due to the departments monitoring expenditures during the year and some capital projects not being completed by June 30. As a result of the excess revenues, operational expenditure controls and capital improvements not being completed, the City ended the year with a fund balance that was \$4,021,137 greater than what was budgeted.

#### **DEBT AND CAPITAL ASSET ADMINISTRATION**

#### Long-term Debt

At year-end, the City had \$23,055,000 in outstanding bonds compared to \$24,600,000 last year. That is a decrease of \$1,545,000 or 6.28 percent as shown in the following table:

		Gove	m	nental		Busi	108	ss-type			
		Ac	tivi	ties		Ac	tiv	ities	T	oti	als

Totals	\$	19,755,000	\$ :	20,775,000		3,300,000		3,825,000	\$ 23,055,000	\$	24,600,000

Additional information on the City's long-term debt can be found in Note E on pages 43-48 of this report.

#### Capital Assets

At June 30, 2014, the capital assets amounted to \$226 million invested in capital assets which include land, water and sewer systems, equipment, vehicles, buildings, park facilities, roads and sidewalks. This represents a net increase of \$5.2 million, or 2.35 percent, over last year due to the investment in street projects, storm water projects, a new fire substation and water and sewer infrastructure improvements. The increase can also be attributed to the replacement of vehicles and equipment during the fiscal year.

#### ECONOMIC FACTORS AND NEXT YEAR'S BUDGET

The upcoming budget brings with it a continuing conservative approach for the revenue amounts. The City of Florence has experienced some economic growth during the last two years and seems to have had a slight recovery in the areas of payroll tax and insurance premium taxes during the current fiscal year. The City has been successful in dealing with budget realities in a positive manner to remain financially sound. The budget for the 2015 fiscal year calls for core revenues remaining consistent with actual results for fiscal year 2014. It is anticipated that property tax revenue will remain constant with the level experienced during the prior fiscal year and that Council will not adopt a property tax increase for the fifth year in a row. The City expects slight growth in the remainder of the core revenue line items. The City has taken an extremely conservative approach to our expenditures to be able to continually provide the highest level of service for the residents. The City will once again reinforce the philosophy about only purchasing that which is deemed to be a necessity. The anticipated slow growth in the community is expected to continue until the economic situation turns around over the next couple of years. The rising cost of all types of insurance, including liability, workers compensation, and health and dental continues to be an annual struggle. In addition, health care reform costs, state mandated retirement contributions and rising motor fuel and utility costs are continuing to increase the annual growth of the City's expenditures. The City is constantly looking for ways to operate the departments more efficiently and effectively. In addition, some changes have been made to the employee benefits to assist in curtailing personnel cost increases in the future.

Funds have been identified in the budget for the partial construction of infrastructure on a 65 acre site designated for retail development. This site will host a Menard's, Costco and several other retail and dining establishments.

The City continues to implement its annual plan to upgrade the City's infrastructure. Contractors were hired and are replacing certain sidewalks and curbs and are repaving City streets. The City has continuing plans to upgrade the water and sewer system as well as the storm water infrastructure during the upcoming year.

#### CONTACTING THE CITY'S FINANCIAL MANAGEMENT

This financial report is designed to provide our citizens, taxpayers, customers, and creditors with a general overview of the City's finances and to show the City's accountability for the money it receives. If you have questions about this report or need additional financial information, contact the Administrative Office or the Department of Finance at 8100 Ewing Boulevard, Florence, Kentucky.

RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDIT		D
CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS TO STATEMENT OF ACTIVITIES	THE	
For the Year Ended June 30, 2014		MINING TO SEE SEELES
Net change in fund balances-total governmental funds	\$	6,760,235
Amounts reported for <i>governmental activities</i> in the statement of activities are different because:		
Governmental funds report capital outlays as expenditures.  However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives as depreciation expense:		
Capital asset purchases capitalized  Depreciation expense		5,808,358 (4,849,587)
Change due to fixed asset retirements		(18,196)
Revenues in the statement of activities that do not provide current fin- ancial resources are not reported as revenues in the funds. This is the change in the amount through the year.		(20,092)
Government funds report the effect of issuance cost, premiums, discounts and similar items when the debt is first issued, whereas these amounts are deferred and amortized in the statement of activities.		(30,309)
Repayment of bond and lease principal is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the statement of net assets.		1,020,000
Accrued interest on long-term debt is reported in the government-wide financial statements and not reported in the governmental funds. This is the change in the amount of interest accrued through the year.		(11,171)
An internal service fund is used by management to charge the costs of certain activities, such as health and dental insurance to individual funds. The net revenues(expenses) of the internal service fund is reported with governmental activities.		867,202
Some expenses reported in the statement of activities do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds such as compensated absences.		(29,123)
Change in net position of governmental activities	\$	9,497,317

The notes to the financial statements are an integral part of this statement.

#### NOTE A-SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The basic financial statements of the City of Florence, Kentucky, have been prepared in conformity with generally accepted accounting principles (GAAP) as applied to government units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The significant accounting policies of the City are described below.

#### Financial Reporting Entity

The City of Florence is a municipality operating under a Mayor/Council form of government. Legislative authority is vested in the six City Council members. As required by accounting principles generally accepted in the United States of America, these financial statements present the government and its component units, entities for which the government is considered to be financially accountable. Blended component units, although legally separate entities are, in substance, part of the government's operations and so data from these units are combined with data of the primary government. Each blended component unit of the City has a June 30 year end. The component units discussed below are included in the City's reporting entity because of the significance of its operational and/or financial relationship with the City.

Included within the Reporting Entity:

#### City of Florence Municipal Properties Corporation

The City of Florence Municipal Properties Corporation was formed to act as an agent and to be instrumental in the financing of public improvements and projects of a capital nature for the City and for the particular purpose of acquiring real estate located within the City and constructing, acquiring and equipping thereon capital improvements, facilities, buildings, structures and related appurtenances. The Corporation finances these projects by the issuance of debt. These debt issues are secured by (1) first mortgage liens on the projects, and (2) lease and option agreements between the Corporation and the City, the construction agreements and pledged receipts. The lease and option agreements require the City to pay rental from specified revenues, on a yearly basis with the option to renew each year. If the City renews the lease from year-to-year, and pays the rentals for each year as stipulated, and when the Corporation has fully paid and retired all the bonds, the Corporation agrees it will convey the properties to the City free and clear.

#### Government-wide Financial Statements

The government-wide financial statements (i.e., the statement of net assets and the statement of changes in net assets) report information on all of the nonfiduciary activities of the primary government. For the most part, the effect of interfund activity has been removed from these statements. Governmental activities, which are normally supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support.

The statement of activities demonstrates the degree to which direct expenses of a given function or segments are offset by program revenues. Direct expenses are those clearly identifiable with a specific function or segment. Program revenues include 1) charges to customers or applicants who purchase, use or directly benefit from goods, services or privileges provided by a given function or segment, and 2) grants and contributions that are restricted to

June 30, 2014

meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

Amounts paid to acquire capital assets are capitalized as assets in the government-wide financial statements, rather than reported as an expenditure. Proceeds of long-term debt are recorded as a liability in the government-wide financial statements, rather than as an other financing source. Amounts paid to reduce long-term indebtedness of the reporting government are reported as a reduction of the related liability, rather than as an expenditure.

Measurement focus, basis of accounting and financial statement presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting as are the proprietary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Property taxes, payroll fees, insurance license fees, occupational license fees and interest are all considered to be susceptible to accrual and have been recognized as revenues in the current fiscal year. All other revenue items are considered recorded as revenue when the funds have been received.

The government reports the following funds of the financial reporting entity:

The general fund is the government's primary operating fund. It accounts for all financial resources of the general government, except for those required to be accounted for in another fund.

The municipal aid road/LGEA fund is used to account for funds received from the state for road improvements and snow removal.

The infrastructure fund is used to account for a designated portion of payroll taxes, storm water fees and grants to be used for the annual repairs to the City road infrastructure and storm water lines.

The asset forfeiture fund accounts for all funds received from seized assets and purchases made with those funds.

The aquatic center fund is used to account for the operations of the City's pool facility.

June 30, 2014

Proprietary funds distinguish operating revenues and expenses from non-operating revenues and expenses. Operating revenues and expenses generally result from providing services in connection with a proprietary fund's principal ongoing operations. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses. The City applies all GASB pronouncements and FASB Statements and Interpretations, APB Opinions and Accounts Research Bulletins issued on or before November 30, 1989, except those that conflict with a GASB pronouncement.

The government reports the following proprietary funds:

The water and sewer fund accounts for the activities of the government's water and sewer sales and services to residential and commercial users.

The World of Golf fund is responsible for the operations of the golf course facility.

The City's only internal service fund is the self-insurance fund for the City's health and dental costs.

Assets, deferred outflows, liabilities and net assets or equity

Cash and Cash Equivalents

Cash and cash equivalents include amounts in demand deposits as well as short-term investments with an initial maturity date within three months of the date acquired by the City.

The City is authorized by state statute to invest in:

- 1. Obligations of the United States and of its agencies and instrumentalities.
- 2. Certificates of deposits.
- Banker's acceptance.
- 4. Commercial paper.
- 5. Bonds of other state or local governments.
- 6. Mutual funds.

Investments

In accordance with Government Accounting Standards Board Statement No. 31, investments held at June 30, 2014 are recorded at fair value based on quoted market prices.

Property Tax Receivable

Property taxes are levied as of January 1 on property values assessed as of the same date. The taxes are billed on approximately October 1 and are due and payable on December 31. On January 1, the bill becomes delinquent and penalties and interest may be assessed by the City.

A lien may be placed on the property on January 1. Total real property tax assessments were \$2,391,940,918 and tangible tax assessments were \$310,617,351.

Short-Term Interfund Receivables/Payables

During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. These receivables and payables are classified as "due from/to other funds" on the balance sheet. Short-term interfund loans are classified as "interfund receivables/payables".

#### Inventories

Inventories are valued at cost, which approximates market, using the first-in/first-out (FIFO) method. The costs of governmental fund-type inventories are recorded as expenditures when consumed rather than when purchased.

#### Prepaid Items

Payments made to vendors for services that will benefit periods beyond June 30, 2014 are recorded as prepaid items.

#### Capital Assets

General capital assets are those assets not specifically related to activities reported in the proprietary fund. These assets are reported in the governmental activities column of the government-wide statement of net assets. Capital assets used by the proprietary fund are reported in the business type activities column of the government-wide statement of net assets. The accounting and reporting treatment applied to capital assets associated with a fund are determined by its measurement focus. General capital assets are long-lived assets of the City as a whole. When purchased, such assets are recorded as expenditures in the governmental funds and capitalized (recorded and accounted for). Capital assets are defined by the City as assets with an initial, individual minimum cost of \$1,000 with a useful life in excess of two years. Infrastructure such as streets, traffic signals and signs are capitalized. The valuation basis for general capital assets are historical costs, or where historical cost is not available, estimated historical cost based on replacement cost.

Capital assets used in operations are depreciated over their estimated useful lives using the straight-line method in the government-wide financial statements. Depreciation is charged as an expense against operations and accumulated depreciation is reported on the respective balance sheet. The range of lives used for depreciation purposes for each capital asset class are as follows:

Buildings	30 years
Building Improvements	10-20 years
Public Domain Infrastructure	25-40 years
Vehicles	5-10 years
Office Equipment	3-10 years

June 30, 2014

#### Compensated Absences

It is the government's policy to permit employees to accumulate earned but unused vacation and sick pay benefits based upon a retirement basis. There is a liability for unpaid accumulated sick leave since the government does have a policy to pay specified amounts when employees retire from service with the government. All vacation and sick pay is accrued when incurred in the government-wide financial statements. A liability for these amounts is reported in governmental funds only if they have matured, for example, as a result of employee resignations or retirements.

#### Long-Term Obligations

The accounting treatment of long-term debt depends on whether the assets are used in governmental fund operations or proprietary fund operations and whether they are reported in the government-wide or fund financial statements.

In the government-wide financial statements, and proprietary fund types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities or proprietary fund type statement of net assets. Bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds.

Long-term debt for governmental funds is not reported as a liability in the fund financial statements. The debt proceeds are reported as revenue and payment of principle and interest reported as expenditures. The accounting for the proprietary fund is the same in the fund statements as it is in the government-wide statements.

#### Deferred Outflows/Inflows of Resources

In addition to assets, the statement of financial position will sometimes report as a separate section for deferred outflows of resources. This separate financial statement element represents a consumption of net position that applies to a future period and so will not be recognized as an outflow of resources (expense/expenditure) until then. The government only has one item that qualifies for reporting in the government-wide statement of net position. A deferred charge on refunding results from the difference in the carrying value if refunded debt and its reacquisition price. This amount is deferred and amortized over the shorter of the life of the refunded or refunding debt.

In addition to liabilities, the statement of financial position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The government only has one type of item, which arises only under a modified accrual basis of accounting that qualifies for reporting in this category. Accordingly, the item, unavailable revenue, is reported only in the governmental funds balance sheet. The governmental funds report unavailable revenues from one source-property taxes. These amounts are deferred and recognized as an inflow of resources in the period that the amounts become available.

#### Fund Balance Policies

Net assets is the difference between assets and liabilities. Net assets invested in capital assets, net of related debt are capital assets, less accumulated depreciation and any outstanding debt related to the acquisition, construction or improvement of those assets.

Fund balance of the governmental funds is reported in various categories based on the nature of any limitations requiring the use of resources for specific purposes. The government itself can establish limitations on the use of resources through either a commitment (committed fund balance) or an assignment (assigned fund balance).

In the fund financial statements, government funds report components of fund balance for amounts that are nonspendable, restricted, committed, assigned or unassigned:

Nonspendable fund balances arise when resources cannot be spent because of their form and because resources must be maintained intact.

Restricted fund balances arise when constraints placed on the use of resources are either externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments or imposed by law through constitutional provisions or enabling legislation.

Committed fund balances are those that can only be used for specific purposes pursuant to constraints imposed by formal action of the government's highest level of decision-making authority, which, for the City is the Council. The Council can by adoption of an ordinance prior to the end of the year, commit fund balance. Once adopted, the limitation imposed by the ordinance remains in place until a similar action is taken to remove or revise the limitation.

Assigned fund balances are those that are intended to be used by the government for specific purposes, but do not meet the criteria to be classified as committed. Council has authorized the finance director to assign fund balance though the financial policies and procedures established. Unlike commitments, assignments generally only exist temporarily. In other words an additional action of does not normally have to be taken for the removal of an assignment. Conversely, additional action is essential to either remove or revise a commitment.

Unassigned fund balance is the residual classification for the general fund. The classification represents fund balance that has not been assigned to other funds and that has not been restricted, committed or assigned to specific purposes within the general fund.

#### Fund Balance Flow Assumptions

Sometimes the government will fund outlays for a particular purpose from both restricted and unrestricted resources (the total of committed, assigned and unassigned fund balance). In order to calculate the amounts to report as restricted, committed, assigned and unassigned fund balance in the government fund financial statements a flow assumption must be made about the order in which resources are considered to be applied. It is the government's policy to consider restricted fund balance to have been depleted before using any of the components of unrestricted fund balance. Further, when the components of unrestricted fund balance can be used for the same purpose, committed fund balance is depleted first, followed by assigned fund balance. Unassigned fund balance is applied last.

June 30, 2014

Revenues, Expenditures and Expenses

Operating Revenues and Expenses

Operating revenues and expenses for the proprietary fund are those that result from providing services and producing and delivering goods and/or services. It also includes all revenue and expenses not related to capital and related financing, non-capital financing or investing activities.

#### Expenditures/Expenses

In the government-wide financial statements, expenses are classified by function for both governmental and business-type activities.

In the fund financial statements, governmental funds are classified as follows:

Governmental funds – by character Current-further classified by function

Debt service

Capital outlay

Proprietary fund - by operating and non-operating

In the fund financial statements governmental funds report expenditures of financial resources. Proprietary funds report expenses related to use of economic resources.

#### Interfund Transactions

Interfund services provided/used are accounted for as revenues, expenditures or expenses. Transactions that constitute reimbursements to a fund for expenditures/expenses initially made from it that are properly applicable to another fund, are recorded as expenditures/expenses in the reimbursing fund and as reductions of expenditures/expenses in the fund that is reimbursed.

#### Use of Estimates

Management uses estimates and assumptions in preparing financial statements. These estimates and assumptions affect the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities, and the reported revenues and expenditures. Actual results could differ from those estimates.

#### Date of Management's Review

Subsequent events were evaluated through September 10, 2014, which is the date the financial statements were available for review.

#### NOTES TO FINANCIAL STATEMENTS

June 30, 2014

#### NOTE B-STEWARDSHIP, COMPLIANCE AND ACCOUNTABILITY

The City follows these procedures in establishing the budgetary data reflected in the financial statements:

- A. In accordance with City ordinance, prior to June 30, the Mayor submits to the Council, a proposed operating budget on a basis consistent with generally accepted accounting principles for the fiscal year commencing the following July 1. The operating budget includes proposed expenditures and the means of financing them for the upcoming year.
- B. By July 1, the budget is legally enacted through passage of an ordinance.
- C. The City Coordinator is required by Kentucky Revised Statutes to present a quarterly report to the Council explaining any variance from the approved budget.
- D. Appropriations continue in effect until a new budget is adopted.
- E. The Council may authorize supplemental appropriations during the year.

Annual budgets are adopted on a basis consistent with generally accepted accounting principles for all funds except the capital projects fund, which is not budgeted. Expenditures may not legally exceed budgeted appropriations at the department level. Any revisions to the budget that would alter total revenues of any fund and expenditures of any department must be approved by the Council; however, with proper approval by the City Coordinator, budgetary transfers within departments can be made. The Council adopted two supplementary appropriation ordinances. All appropriations lapse at fiscal year end.

The City Council has adopted guidelines for maintaining a minimum general fund balance in the amount of 17% of budgeted operating expenditures and recurring transfers. In either case, unusual items such as one-time expenditures shall be excluded from the calculation. In addition, Council has adopted a resolution and established a stabilization fund balance. This fund balance may only be used for operations to pay for expenditures when the unreserved fund balance falls below the minimum fund balance of 17% of expenditures and recurring transfers. Each December 31<sup>st</sup>, Mayor and Council shall determine if any funds are to be transferred to increase the stabilization fund balance.

#### NOTE C-DEPOSITS AND INVESTMENTS

As of June 30, 2014, the City had the following investments:

	Fair Value	Weighted Average Maturity(Years)
Cash	\$ 1,921	inantitementitaaniningaanininalleenalineenintainineenintainineenintainineenintainineenintainineenintainineenin
Certificates of deposit	6,120,998	0.75
Government obligations	11,075,039	5.00
Total fair value	\$ 17,197,958	
Portfolio weighted average maturity		3.20

Interest rate risk. In accordance with the City's investment policy, interest rate risk is limited by investing in public funds with the highest rate of return with the maximum security of principal. Investments are undertaken in a manner that seeks to ensure preservation of the capital in its portfolio.

Credit risk. State law limits the types of authorized investment instruments to obligations of the United States, its agencies, and instrumentalities. In addition, certificates of deposit or bonds of a bank or the Commonwealth of Kentucky, securities issued by a state or local government or shares of mutual funds are acceptable investments. The City's investment policy limits its authorized investment instruments in these investments to one of the top three highest rated categories by a nationally rated agency. As of June 30, 2014, the City's investment in government was rated Aaa by Moody's and AAAm by Standard & Poor's.

Concentration of credit risk. The City may not invest, at any one time, funds in any one of the above listed categories exceeding twenty percent of the total amount of funds invested on behalf of the City.

Custodial credit risk – deposits. For deposits, this is the risk that in the event of a bank failure, the City's deposits will not be returned. The City maintains deposits with financial institutions insured by the Federal Deposit Insurance Corporation (FDIC). As allowed by law, the depository bank should pledge securities along with FDIC insurance at least equal to the amount on deposit at all times. As of June 30, 2014, the City's deposits are entirely insured and/or collateralized with securities held by the financial institutions on the City's behalf and the FDIC insurance.

Custodial credit risk – investments. For an investment, this is the risk, that in the event of the failure of the counterparty, the City will not be able to recover the value of its investments that are in the possession of an outside party. The policy permits investment in U.S. Treasury obligations and obligations backed by the full faith and credit of the United States and in the securities issued by certain associations and corporations established by the government of the United States. The City had custodial credit risk at June 30, 2014 in the amount of \$11,075,039 for its government obligations. The related securities totaling this amount are uninsured, unregistered and held by various Trust departments.

#### NOTE D-CAPITAL ASSETS AND DEPRECIATION

Capital assets activity for the year ended June 30, 2014 was as follows:

#### Advance Refundings

The City issued \$3,110,000 in general obligation bonds with interest rates ranging from 2.0% to 3.375%. The proceeds were used to partially advance refund \$2,700,000 of outstanding 2003A general obligation bonds from the year 2013 and on which had interest rates ranging from 3.55% to 4.85%. The net proceeds of \$3,001,150 (less a discount of \$46,650 and the payment of costs of issuance of \$59,000) were deposited in an irrevocable trust with an escrow agent to provide funds for the future debt service payment on the refunded bonds. As a result, the 2003A bonds from 2013 on are considered defeased and the liability for those bonds have been removed.

The reacquisition price exceeded the net carrying amount of the old debt by \$301,150. This amount is being netted against the new debt and amortized over the remaining life of the new debt. The City advance refunded the 2003A general obligation bonds to reduce its total debt service over 23 years by \$370,362 and to obtain an economic gain (difference between the present values of the debt service payments of the old and new debt) of \$264,738.

#### Conduit Debt

The City has issued General Obligation Bonds to provide assistance to the Northern Kentucky Area Development District for the construction of a facility deemed to be in the public interest. The bonds are secured by the property financed. Upon repayment of the bonds ownership transfers to the entity served by the bond issuance. Neither the City, State, nor any political subdivision thereof, is obligated in any manner for the repayment of the bonds. Accordingly, the bonds are not reported as a liability in the accompanying financial statements. As of June 30, 2014 the bonds outstanding were \$2,400,000.

Changes in Governmental-Type Long-Term Liabilities

During the year ended June 30, 2014, the following changes occurred in liabilities reported in the general long-term debt:

	June 30, 2013	Additions	Retirements		June 30, 2014		Amounts Due Within One Year
Compensated			·	**		*	wateren was well and a while half the first water frame to have
absences	\$ 1,179,369	\$ 788,448	\$ (817,571)	\$	1,150,246	\$	800,000
Bonds payable:

Compensated absences are liquidated by the general fund.

The government-wide statement of net assets includes \$1,765,000 of long-term liabilities due within one year for governmental activities and \$645,000 for business-type activities.

Changes in Business-Type Long-Term Liabilities

Long-term liability activity for business-type activities for the year ended June 30, 2014 was as follows:

	Balance			Balance		Amounts
	June 30,			June 30,	ľ	ue Within
	2013	Additions	 Retired	2014		One Year
Bonds payable-water/sewer	\$ 355,000	\$ £/0	\$ (175,000) \$	180,000	\$	180,000

Compensated absences	96,295	100,611	(94,412)	102,494		95,000
Bonds payable-golf course	1,395,000		 (325,000)	1,070,000		340,000
	\$ 3,921,295	\$ 100,611	\$ (619,412)	3,402,494	\$	645,000

#### NOTE F-CLAIMS AND JUDGMENTS

Amounts received or receivable from grantor agencies are subject to audit and adjustment by grantor agencies, principally the federal government. Any disallowed claims including amounts already collected, may constitute a liability of the applicable funds. The amounts, if any, of expenditures which may be disallowed by the grantor cannot be determined at this time although the City expects such amounts, if any, to be immaterial.

#### NOTE G-EMPLOYEE RETIREMENT SYSTEM

Employer Contributions

County Employees Retirement System (CERS)

City employees who work at least 100 hours per month participate in the County Employees Retirement System (CERS). Under the provisions of Kentucky Revised Statute 61.645, the Board of Trustees of Kentucky Retirement Systems administers the CERS.

The plan issues separate financial statements, which may be obtained by request from Kentucky Retirement Systems, 1260 Louisville Road, Frankfort, Kentucky 40601.

Plan Description - CERS is a cost-sharing multiple-employer defined benefit pension plan that covers substantially all regular full-time members employed in positions of each county and school board, and any additional eligible local agencies electing to participate in the System. The plan provides for retirement, disability, and death benefits to plan members. Retirement benefits may be extended to beneficiaries of plan members under certain circumstances. Cost-of-living (COLA) adjustments are provided at the discretion of the state legislature.

Non-hazardous Contributions - For the year ended June 30, 2014, all plan members were required to contribute 5% of their annual creditable compensation. Any plan members that entered the retirement plan after August 31, 2008, are required to contribute an additional 1% of their annual creditable compensation for health insurance. Participating employers were required to contribute at an actuarially determined rate. Per Kentucky Revised Statute Section

61.565(3), normal contribution and past service contribution rates shall be determined by the Board on the basis of an annual valuation last preceding the July 1 of a new biennium. The Board may amend contribution rates as of the first day of July of the second year of a biennium, if it is determined on the basis of a subsequent actuarial valuation that amended contribution rates are necessary to satisfy requirements determined in accordance with actuarial bases adopted by the Board. For the year ended June 30, 2014, participating employers contributed 18.89% of each employee's creditable compensation. The actuarially determined rate set by the Board for the year ended June 30, 2014 was 18.89% of creditable compensation. Administrative costs of Kentucky Retirement System are financed through employer contributions and investment earnings.

Hazardous Contributions - For the year ended June 30, 2014, all plan members were required to contribute 8% of their annual creditable compensation. Any plan members that entered the retirement plan after August 31, 2008, are required to contribute an additional 1% of their annual creditable compensation for health insurance. The state was required to contribute at an actuarially determined rate. Per Kentucky Revised Statute Section 61.565(3), normal contribution and past service contribution rates shall be determined by the Board on the basis of an annual valuation last preceding the July 1 of a new biennium. The Board may amend contribution rates as of the first day of July of the second year of a biennium, if it is determined on the basis of a subsequent actuarial valuation that amended contribution rates are necessary to satisfy requirements determined in accordance with actuarial bases adopted by the Board. For the year ended June 30, 2014, participating employers contributed 35.70% of each employee's creditable compensation. The actuarially determined rate set by the Board for the year ended June 30, 2014 was 35.70% of creditable compensation. Administrative costs of KRS are financed through employer contributions and investment earnings.

The required contribution and the actual percentage contributed by the City for the current and previous two years are as follows:

Year	,	Contribution	Contributed
2014	\$	3,240,087	100%
2013	\$	3,357,501	100%
2012	\$	3,242,238	100%

#### Medical Insurance Plan

The CERS provides post-retirement healthcare benefits to eligible members and dependents, under a cost-sharing multiple employer defined benefit plan. Medical benefits are offered to members who have retired from service or disability. The post-retirement healthcare is financed though member contributions and state appropriations.

#### NOTE H-DEFERRED COMPENSATION PLAN

Employees of the City of Florence may participate in a deferred compensation plan adopted under the provisions of Internal Revenue Code Section 457 (Deferred Compensation Plans with Respect to Service for State and Local Governments). Employees may also participate in a Section 401(k) adopted under the provisions of the Internal Revenue Code.

June 30, 2014

The deferred compensation plan is available to all employees of the City. Under the plan, employees may elect to defer a portion of their salaries and avoid paying taxes on the deferred portion until the withdrawal date. The deferred compensation amount is not available for withdrawal by employees until termination, retirement, death, or unforeseeable financial emergency.

The deferred compensation plans are administered by ICMA and Kentucky Public Employees' Deferred Compensation Plan.

#### NOTE I-CONTINGENT LIABILITIES

The City is a defendant in various lawsuits. Although the outcome of these lawsuits is not presently determinable, in the opinion of the City's Attorney, the resolution of these matters will not have a materially adverse effect on the financial condition of the government.

#### NOTE J-INTERFUND TRANSACTIONS

A summary of the interfund account balances is as follows:

Due from/to other Funds		
Receivable Funds(s)	Payable Fund(s)	Amount
General	Water and sewer	\$ 21,307
General	Health and dental	480
Infrastructure	General	(22,991)
Total		\$ (1,204)

Due from and due to other funds represent short-term accounts receivable and payable. The balances in these accounts are typically the result of time differences between the date that goods and services were provided and when payment occurred.

Transfers in/out		Amount
General	Municipal aid/LGEA	125,000
General	Infrastructure	1,500,000
General	Aquatic center	200,000
General	Golf Course	100,000
Total		\$ 1,925,000

During the year, transfers are used to move general fund resources to provide annual subsidy to the transit fund. For the year ended June 30, 2014, the City made the following annual transfers:

- 1) A transfer of \$125,000 was made from the general fund to the special revenue fund for annual funding amounts for snow removal.
- 2) A transfer of \$1,500,000 was made from the general fund to the infrastructure fund to provide funding for the initial infrastructure for a retail development on Mall Road..
- 3) A transfer of \$200,000 was made from the general fund to the aquatic center for the annual subsidy to support the recreation operations.

4) A transfer of \$100,000 was made from the general fund to the golf course fund for the annual subsidy to support the recreation operations.

#### NOTE K-RISK MANAGEMENT

The City is exposed to various risks of losses related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees, and natural disasters. The City has obtained insurance coverage through a commercial insurance company. In addition, the City has effectively managed risk through various employee education and prevention programs through the efforts and cooperation of its department heads. All risk for general liability management activities are accounted for in the General Fund. Expenditures and claims are recognized when probable that a loss has occurred and the amount of loss can be reasonably estimated.

The City has established a Health and Dental Self-Insurance Fund. Employees participate in this program and certain other medical insurance programs offered by the City. Under this program, the first \$50,000 of a participant's medical claim are payable by the health and dental self-insurance fund. The City purchases insurance for claims in excess of coverage provided by the fund. The general fund participates in the program and makes payments to the health and dental fund based on estimates of the amount needed to pay current year claims. The claims liability of \$163,363 reported in the fund at June 30, 2014, is based upon the requirements of GASB Statement No. 10, which requires that a liability for claims be reported if information prior to the issuance of the financial statements indicates that it is probable that a liability has been incurred at the date of the financial statements and the claims liability amount were:

	Balance at Beginning of Fiscal Year	Claims and Changes in Estimates	Claims Payments	June 30,
2011-2012	\$ 85,310	\$ 2,335,901	\$ 2,260,239	\$ 160,972
2012-2013	\$ 160,972	\$ 2,666,124	\$ 2,796,983	\$ 30,113
2013-2014	\$ 30,113	\$ 1,950,897	\$1,817,647	\$ 163,363

The City Attorney estimates that the amount of actual or potential claims against the City as of June 30, 2014, will not materially affect the financial condition of the City. Therefore, the General Fund contains no provision for estimated claims. No claim has exceeded insurance coverage amounts in the past three fiscal years.

#### NOTE L - COMMITMENTS

At June 30, 2014, the City had the following commitments with respect to the following projects:

<u>Project s</u>	Commitments
US 42 Turn Lane	\$590,000
Mall Road Development	\$3,000,000

This page left blank intentionally.

### REQUIRED SUPPLEMENTARY INFORMATION

Annual budgets are adopted on a basis consistent with generally accepted accounting principles for all funds except the capital projects fund, which is not budgeted. Expenditures may not legally exceed budgeted appropriations at the department level. Any revisions to the budget that would alter total revenues of any fund and expenditures of any department must be approved by the Council; however, with proper approval by the City Coordinator, budgetary transfers within departments can be made.

Governmental Unit	он	Debt Outstanding	Estimated Percentage Applicable(1)	a	Estimated Share of Overlapping Debt
Debt repaid with property taxes: County Subtotal, overlapping debt	\$	45,415,085	26.40%	\$	12,884,664 12,884,664
City of Florence direct debt					19,755,000
Total direct and overlapping				\$	32,639,664

Source: Kentucky Local Debt Report

Note: Overlapping governments are those that coincide, at least in part, with the geographic boundaries of the city. This schedule estimates the portion of the outstanding debt of those overlapping governments that is borne by the residents and businesses of the City of Florence. This process recognizes that, when considering the government's ability to issue and repay long-term debt, the entire debt burden borne by the residents and businesses should be taken into account. However, this does not imply that every taxpayer is a resident, and therefore responsible for repaying the debt, of each overlapping government.

(1) The percentage of overlapping debt applicable is estimated using taxable assessed property values. Applicable percentages were estimated by determining the portion of the county's taxable assessed value that is within the government's boundaries and dividing it by the county's total taxable assessed value.

# INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

Honorable Diane E. Whalen, Mayor Members of City Council City of Florence, Kentucky

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, each major fund, and the aggregrate remaining fund information of City of Florence, Kentucky as of and for the year ended June 30, 2014, and the related notes to the financial statements, which collectively comprise the Board's basic financial statements, and have issued our report thereon dated September 12, 2014.

### Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the City of Florence, Kentucky's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the City of Florence, Kentucky's internal control. Accordingly, we do not express an opinion on the effectiveness of the City of Florence, Kentucky's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

This page left blank intentionally.

### Compliance and Other Matters

As part of obtaining reasonable assurance about whether City of Florence, Kentucky's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

### Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
